- Responsive Design: Bootstrap
- Bug reporting tool: Jira
- Web design tools: FIGMA
- API testing tools: Postman, Soap UI
- Test automation tools: selenium web driver
- Agile & Scrum development methodology
- Experience in Data mining, Data analytics, Data visualization and Data processing
- Problem Solving and Algorithmic Thinking
- Debugging and Troubleshooting
- Team Collaboration and Communication
- Manual & Automation Testing
- Performance & Accessibility Testing tools: JMeter, OWASP zap

## PROJECTS

1. Recommendation system
  - Developed a recommendation system to match lecturers to students based on their final year project area of interest using semantic search and word embedding tools.
  - Implemented it with Python, Javascript, Google Sites, HTML, CSS
2. Real-Estate website
  - Designed and developed a responsive real estate website using HTML, CSS, jQuery and JavaScript.
  - Showcased landing page, services provided by agency, property locations, prices, and contact information.
  - Employed media queries for optimal mobile and desktop viewing.
  - Deployed and updated it using version control tool like GitHub.

# **PROFESSIONAL EXPERIENCE**

## **CREDIT CAPITAL FINANCE AND INVESTMENT LIMITED**

**(Sept 2019 - 2020)**

**Position:** Intern for IT department

**Job Functions:**

- Assisted in providing technical support to employees, resolving hardware and software issues.
- Conducted system maintenance and performed updates on workstations.
- Assisted in routine maintenance tasks, including system updates, software installations, and antivirus scans to ensure the smooth functioning of the organization's IT environment.
- Participated in testing the software application for the organizations' first app known as 'Sharp credit', to ensure it functioned correctly, was error-free and met user requirements.
- Collaborated with other IT team members and departments, actively participating in team meetings and contributing to a positive work environment.

**(Jan 2021 till date)**

**Position:** Junior Test Analyst

**Job Functions:**

- Collaborated with the QA team to develop test plans, test cases, and test scripts based on business requirements.
- Executed test cases and reported defects using the company's designated defect tracking system.
- Participated in agile ceremonies, including sprint planning, daily stand-ups, and retrospectives.
- Assisted in the creation and maintenance of test data and test environments.
- Conducted functional, integration, regression, and performance testing to ensure software quality.
- Developed and executed automated test scripts using Selenium WebDriver, reducing testing time by 30%.
- Collaborated with developers and business analysts to reproduce and investigate reported issues.
- Documented test results and generated comprehensive test reports for management and stakeholders.
- Actively participated in continuous improvement initiatives to enhance testing processes and methodologies.
